#### **NOTES:**

1. AC-Dimming series, a new AC/DC LED driver that operates directly from AC line dimmer and provides an isolated, Class 2 low voltage constant current to properly drive the LED luminaries.
2. Lamps must be wired in series, and total value of Vf should be under rated DC Voltage.
3. Disconnect the mains supply before installing, do not turn on/off from output port.
4. Parameter measured at full load 25°C ambient temperature.
5. Under direct driving, the power supply will work in "constant current mode (CC)" and output voltage of the power supply will be clamped by sum of forward voltage (V) of the LED strip.
